# Center for Code Excellence

Expertise for superior software quality

## Recognizing software trends

Digitalization and software belong together like pretzels and butter. To manage the digital transformation, companies need excellent software development expertise. Starting today, you can rely on our Center for Code Excellence (CCE). With know-how and technologies becoming increasingly more complex, small and medium enterprises sometimes lack the resources needed to keep pace with developments in software.

## Enabling software excellence

CCE boosts expertise in agile development, automated quality assurance (testing, security, efficiency), and evolution and maintenance for individual industries and application fields. CCE provides professional know-how that allows companies to develop expertise, better estimate trends and methods and strengthen their software development excellence.

**fortiss** is the research institute of the Free State of Bavaria for software-intensive systems and services with headquarters in Munich. The institute currently has around 170 employees, who collaborate on research, development and transfer projects with universities and technology companies in Bavaria, Germany and Europe.
